This is a special educational initiative by the Cancer Council targeting the at-risk groups in the community. Topics to be covered include:

- prevalence of hepatitis B in Victoria
- identifying who should be screened for hepatitis B
- the referral processes involved with a positive result
- ongoing management to reduce the incidence of liver cancer
- morbidity and mortality associated with chronic hepatitis B and liver cancer

There will be opportunities to discuss management and treatment of hepatitis B directly with viral hepatitis specialists representing hospitals across Melbourne.
